## We've been listening.

We know you're busy, so beginning in November, Iowa Radiology will provide digital mammography services on the first Saturday of every month from our Clive office.

Digital mammography uses a computer, instead of film, to record x-ray images of the breast. The images become a more versatile diagnostic tool and can then be enlarged or highlighted to detect breast cancer in its earliest stages.

Invest in your future today by scheduling your annual screening mammogram at our Clive location and do it on a Saturday that fits your schedule.
